## ACADEMIC PROJECTS

---

- **Customer Segmentation Using Clustering for Digital Detox** 2025  
Analyzed patterns of digital device usage by collecting structured user data and performing basic data cleaning and normalization. Applied K-Means++ clustering to group users based on usage behavior such as screen time, sleep hours, stress levels, and productivity. Documented cluster observations to suggest practical and manageable digital detox recommendations.
- **Sign Language Recognition System** 2025  
Developed a basic gesture recognition prototype that captures hand movements through a webcam and converts them into text. Used MediaPipe to extract hand landmarks and applied a trained model to classify common hand gestures. Focused on understanding computer vision workflows and real-time prediction processes.
